EDUCATION

B.E. in Computer Science

V.V.P. Engineering College

June 2024 – December 2028

Currently Student Of Second Year

PROJECTS

Notes4All

A Full Stack Project for Notes

- Created a full stack website to help students find notes, assignments, and lab manuals for all subjects.
- Implemented complete backend using Node.js: JWT Authentication (Access + Refresh Tokens), Cloudinary image uploads, Multer temporary storage, MongoDB connection, and structured routes/controllers.
- Live Project:** Vite + React (study-frontend-iota.vercel.app)
- Tech Used:** Node.js, Express, React.js, Redux Toolkit, MongoDB, Cloudinary, JSON Web Tokens, Multer, Mongoose.

Smart Attendance System

Attendance Automation

- A complete full stack project to take student attendance through QR Code.
- Implemented real-time communication via WebSocket for live Faculty Dashboard.
- Node.js server receives student's credentials from mobile and transmits to live running faculty session dashboard.
- Live Project:**

Vite + React (https://smart-attendance-system-snowy.vercel.app)

- Tech Used:** Node.js, Express, Socket.io, React.js, GPS Api.

Privacy Agent

AI-Driven Mobile Assistant with On-Device Memory

- Developed a cross-platform mobile application using **React Native** and **Native wind**, implementing a responsive UI for real-time AI interactions.
- Built a robust **Node.js/Express** backend to integrate **Google Gemini 2.5 Flash-Lite** (for high-speed responses) and **Gemma 3 27B** (for complex reasoning) via the **Google AI SDK**.
- Engineered a local-first memory system using **SQLite**, ensuring all user chat history and personal reminders are stored 100% on-device to prevent cloud data leakage.

•Live Project:

privacy-agent (https://privacy-agent-app-download.vercel.app)

- TechUsed:** Node.js, Express, React-Native, Google API.

MOST PROUD OF

Get 9.13 CGPA
in first year of college

Smart India Hackathon
presented a ppt - Smart Attendance System

SKILLS

C/C++

Javascript

NodeJS

Git/Github

Vercel

ReactJS

Redux Tool Kit

Socket.io

MySQL

MongoDB

LANGUAGES

Gujarati

English

Hindi

EXPERIENCE

MERN Intern

White Label Fox Pvt. Ltd.

January 2026 - March 2026

Skills i learn: NestJs, NextJs, NodeJs, ExpressJs, MongoDB, PostgreSQL

Code Carnival

36 Hours Hackathon

Create a real time payment tracker for SMEs.

Trained a machine learning model with tensorflowjs to predict customer payment delay or not.

Certificate: JAY-JOSHI-Certi.png

MINI/SIDE PROJECTS

Hand Tracker Electron App

Cursor Movemnet With Hands

- Create a electron application for pc to move cursor with hand movements through webcam.
- Use hand-pose model of TensorflowJs
